

Bios for Rick Brenner

Here are seven bios of varying lengths:

- [121 words](#)
- [139 words](#)
- [185 words](#)
- [228 words](#)
- [279 words](#)
- [324 words](#)
- [457 words](#)

1. 121 Words

Rick Brenner is principal of Chaco Canyon Consulting. He works with people in problem-solving organizations that make complex products that need state-of-the-art teamwork, and with organizations that want to create innovative products by building stronger relationships among their people. In 25 years as a software developer, project manager, software development manager, entrepreneur and consultant, he has developed valuable insights into the interactions between people in the workplace environment, and between people and the media in which they work.

Rick holds a Masters Degree in Electrical Engineering from MIT. His current interests focus on personal and organizational effectiveness in abnormal situations, such as dramatic change, enterprise emergencies, and high-pressure project situations. His articles and weekly newsletter are available at his Web site, <http://www.ChacoCanyon.com/>.

2. 139 Words

Rick Brenner is principal of Chaco Canyon Consulting. He works with people in problem-solving organizations who want to make complex products that need state-of-the-art teamwork, and with organizations that want to create innovative products by building stronger relationships among their people. In his 25 years as a software developer, project manager, software development manager, entrepreneur and consultant, he has developed valuable insights into the interactions between people in the workplace environment, and between people and the media in which they work.

Rick holds a Masters Degree in Electrical Engineering from MIT. His current interests focus on improving personal and organizational effectiveness in abnormal situations, as in the case of dramatic change, in enterprise emergencies, and high-pressure project situations. He has written a number of essays on these subjects, and publishes a weekly newsletter, available at his Web site, <http://www.ChacoCanyon.com/>.

3. 185 Words

Rick Brenner is principal of Chaco Canyon Consulting. He works with people in problem-solving organizations that need state-of-the-art teamwork and with organizations that want to create innovative products by building stronger relationships among their people. In his 25 years as a software developer, project manager, software development manager, entrepreneur and consultant, he has developed valuable insights into the interactions between people in the workplace environment, and between people and the media in which they work. He coaches managers at all levels.

Mr. Brenner has held positions in software development and software development management, at Symbolics, Inc., and at Draper Laboratory, where he conducted

research into the software development process. Since 1993, he has taught a course in business modeling at the Harvard University Extension School.

Mr. Brenner holds a Masters Degree in Electrical Engineering from MIT. His current interests focus on improving personal and organizational effectiveness in abnormal situations, such as dramatic change, enterprise emergencies, and high-pressure project situations. He has written a number of essays on these subjects, available at his Web site, <http://www.ChacoCanyon.com/>, and writes and edits a weekly email newsletter, Point Lookout.

4. 228 Words

Rick Brenner is principal of Chaco Canyon Consulting. He works with people in problem-solving organizations that are making products so novel or complex that they need state-of-the-art teamwork and stronger relationships among their people. In his 25 years as a software developer, project manager, software development manager, entrepreneur and consultant, he has developed valuable insights into the interactions between people in the workplace environment, and between people and the media in which they work. He coaches managers at all levels, emphasizing development of interpersonal skills.

Mr. Brenner has held positions at Symbolics, Inc., and at Draper Laboratory, both of Cambridge, Massachusetts. At Symbolics, he was responsible for development of products based on Macsyma, a computer algebra system. At Draper, he was a principal investigator in a DARPA program, the Evolutionary Design of Complex Software, where he conducted research into advanced concepts for software development environments based on dynamic object-oriented programming languages. Since 1993, he has taught a course in business modeling at the Harvard University Extension School.

Mr. Brenner holds a Masters Degree in Electrical Engineering from MIT. His current interests focus on improving personal and organizational effectiveness in abnormal situations, such as dramatic change, enterprise emergencies, and high-pressure project situations. He has written a number of essays on these subjects, available at his Web site, <http://www.ChacoCanyon.com/>, and writes and edits a weekly email newsletter, Point Lookout.

5. 279 Words

Rick Brenner is principal of Chaco Canyon Consulting. He works with people in dynamic problem-solving organizations that make complex products or deliver sophisticated services that need state-of-the-art teamwork, and with organizations that achieve high performance by building stronger relationships among their people. In his 25 years as a software developer, project manager, software development manager, entrepreneur, consultant and coach he has developed valuable insights into the interactions between people in a problem-solving environment, and between people and the media in which they work. He coaches managers at all levels, emphasizing development of interpersonal skills, especially in fluid, high-stress contexts.

Mr. Brenner has held positions at Symbolics, Inc., and at Draper Laboratory, both of Cambridge, Massachusetts. At Symbolics, he was responsible for development of all products based on Macsyma, a large and very sophisticated computer algebra program. At Draper Laboratory, he was a principal investigator in a DARPA program, the Evolutionary Design of Complex Software, where he conducted research into advanced concepts for real-time software development environments based on dynamic object-oriented programming languages. Since 1993, he has taught a course in business modeling at the Harvard University Extension School.

Mr. Brenner holds a Masters Degree in Electrical Engineering from MIT. He trained in Satir methods under Gerald M. Weinberg and Jean McLendon, attending and staffing many of their workshops over a period of seven years. His interests focus on improving personal and organizational effectiveness, especially in abnormal situations, as in the case of continuous change, in enterprise emergencies, and high-pressure project situations. He writes and edits a free email newsletter, Point Lookout, and has written a number of essays on these subjects, available at his Web site, <http://www.ChacoCanyon.com/>.

6. 324 Words

Rick Brenner is principal of Chaco Canyon Consulting. He works with people in dynamic problem-solving organizations that are making products so novel or complex that they need state-of-the-art teamwork and stronger relationships among their people. In his 25 years as a software developer, project manager, software development manager, entrepreneur, consultant and coach, he has developed valuable insights into the interactions between people in complex dynamic environments, and between people and the media in which they work.

As a coach, he works with managers at all levels, emphasizing development of interpersonal skills, especially in fluid, high-stress contexts, such as organizations that are moving from a strict operational orientation to one in which ongoing operations must compete for resources with special enterprise-scale projects. Such a mixed environment creates organizational stresses that leaders must understand, not only because of the change-related issues that arise, but also because of the challenges to managers that they create, even when equilibrium is attained.

Mr. Brenner has held positions at Symbolics, Inc., and at Draper Laboratory, both of Cambridge, Massachusetts. At Symbolics, he was responsible for development of products based on Macsyma, a computer algebra system. At Draper, he was a principal investigator in a DARPA program, the Evolutionary Design of Complex Software, where he conducted research into advanced concepts for software development environments based on dynamic object-oriented programming languages. Since 1993, he has taught Spreadsheet Models for Managers, a course he devised, at the Harvard University Extension School.

Mr. Brenner holds a Masters Degree in Electrical Engineering from MIT. He is a member of the National Speakers Association, The Boston Software Process Improvement Network, and the American Society for Quality. His current interests focus on improving personal and organizational effectiveness in abnormal situations, such as dramatic change, enterprise emergencies, and high-pressure project environments. He has written a number of essays on these subjects, available at his Web site, <http://www.ChacoCanyon.com/>, and writes and publishes a weekly email newsletter, Point Lookout.

7. 457 Words

Rick Brenner is principal of Chaco Canyon Consulting. He works with people in dynamic problem-solving organizations that are making products so novel or complex that they need state-of-the-art teamwork and stronger relationships among their people. In his 25 years as a software developer, project manager, software development manager, entrepreneur, consultant and coach, he has developed valuable insights into the interactions between people in complex dynamic environments, and between people and the media in which they work.

As a coach, he works with managers at all levels, emphasizing development of interpersonal skills, especially in fluid, high-stress contexts, such as organizations that are moving from a strict operational orientation to one in which ongoing operations must compete for resources with special enterprise-scale projects. Such a

mixed environment creates organizational stresses that leaders must understand, not only because of the change-related issues that arise, but also because of the challenges to managers that they create, even when equilibrium is attained.

Over a period of seven years, he attended or assisted in numerous workshops under Jerry Weinberg, Dani Weinberg and Jean McLendon. It was during this period that he acquired his skills in designing and facilitating experiential education. He was a founding organizer of the AYE Conference.

Mr. Brenner has held positions at Symbolics, Inc., and at Draper Laboratory, both of Cambridge, Massachusetts. At Symbolics, he was responsible for development of products based on Macsyma, a computer algebra system. At Draper, he was a principal investigator in a DARPA program, the Evolutionary Design of Complex Software, where he conducted research into advanced concepts for software development environments based on dynamic object-oriented programming languages. Since 1993, he has taught Spreadsheet Models for Managers, a course he devised, at the Harvard University Extension School.

He serves as the facilitator and group administrator for a discussion group he created at LinkedIn.com: [Office Politics, Workplace Politics and Organizational Politics](#). Discussions there are energetic and enlightening. The group now has over 500 members.

Mr. Brenner holds a Masters Degree in Electrical Engineering from MIT. He is a member of the National Speakers Association (NSA), the Boston Software Process Improvement Network, and the Agile Bazaar Chapter of the Association for Computing Machinery. He has served in various leadership roles ranging from board member to vice president to chair (president) in local chapters of these societies. He was selected Chapter Member of the Year for NSA New England in 2001 and 2007.

His current interests focus on improving personal and organizational effectiveness in abnormal situations, such as dramatic change, enterprise emergencies, and high-pressure project environments. He has written a number of essays on these subjects, available at his Web site, <http://www.ChacoCanyon.com/>, and writes and publishes a weekly email newsletter, *Point Lookout*, which now has over 3,000 subscribers.
